The Honey-Moon [graphic]. Mezzotint,
 hand-colored.
 PRINTED FOR CARINGTON BOWLES,
 LONDON, JUNE 1777

this list, Richard Walker, apothecary to the Prince of Wales, adds Arabic henna, manna, and rhubarb.³⁴ The influence of the Arabian medicine first on the Greek, then on the French and English physicians, although often decried, brought an influx of medicinal plants from or through the Arabian

Peninsula to Europe, where they were customarily used in tinctures, purges, and other more or less effective elixirs.³⁵ Alternately, incense was used for its love-inducing and rejuvenating properties, as seen in an 1787 etching by James Gillray representing a group of five elderly women of fashion attending an altar of Love (fig. 4.5).³⁶

Book. Interspersed with Some Occasional Observations on Some of the Most Celebrated Modern Dispensatories, and the Present State of Pharmacy (London: Printed and Sold by R. Willock, 1744). This volume contains a wealth of detailed recipes for various afflictions, albeit providing few specifics as to what was treated by using them.

34 Richard Walker, *Memoirs of Medicine; Including a Sketch of Medical History from the Earliest Accounts to the Eighteenth Century* (London: Printed for J. Johnson, 1799).

35 For the influence of the Arabian medicine on Western Europe, see volume 3 of John Astruc's *Treatise on the Diseases of Women, in Which Is Attempted to Join a Just Theory to the Most Safe and Approved Practice...* (London: Printed for J. Nourse, 1767). For detailed recipes of medicines containing ingredients of Arabic origin, see *Pharmacopoeia Reformata* cited above.

36 Arabian incense is made by using frankincense or gum Arabic resin mixed with sweet-smelling essential oils, such as myrrh and oud.
