

Figure 4.6. Input Biomass Fuel for Each Type of Biomass Power Generation

PKS = palm kernel shell.

Heat value used: Domestic logs and wood chips: 19.4 MJ/kg; Domestic wood pellets, Import pellets, chips: 15.5 MJ/kg; PKS: 18 MJ/kg; Construction wood waste, Other waste, and Others: assuming the same with wood pellets.

Source: Depicted by IEEJ based on Japan Woody Bioenergy Association, 2020.

According to Japan's trade statistics, its import of wood pellets has increased around 16 times from 2014 to 2019. Viet Nam and Canada are the largest suppliers of Japan's wood pellet imports (Figure 4.7). On the other hand, domestic wood pellet production stayed almost the same over the same period (Figure 4.8).
