

The Data Journey

To get started, let's consider the data visualization¹ in Figure 1.1 below.

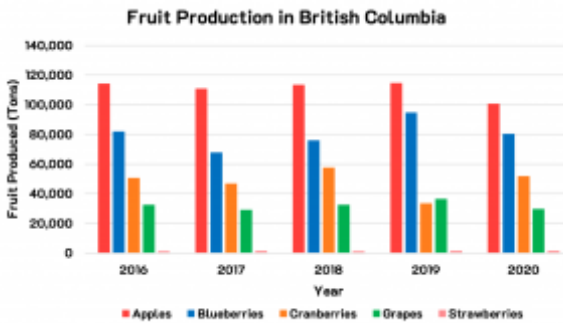

Figure 1.1. Production of apples, blueberries, cranberries, grapes, and strawberries in British Columbia, 2016-2020.

The underlying raw data went through many stages before it was presented to you in this data visualization. The information had to be:

- Collected via surveys
- Inputted into a database
- Stored on secure servers
- Cleaned for accuracy and consistency
- Analyzed to understand the trends
- Presented as a bar graph
