About the Authors	viii
Introduction	1
 Part I. <u>Chapter One - Exploring Your Data</u>	
Section 1.1: Data and Types of Statistical Variables	3
Section 1.2: Descriptive Statistics	5
Section 1.3: Missing Data	6
Section 1.4: Checking Values	7
Section 1.5: Normality	8
Section 1.6: Outliers	9
Section 1.7: Chapter One Self-Test	10
 Part II. <u>Chapter Two - Test Statistics, p Values, Confidence Intervals and Effect Sizes</u>	
Section 2.1: p Values	12
Section 2.2: Significance	13
Section 2.3: Confidence Intervals	14
Section 2.4: Effect Sizes	16
Section 2.5: Statistical Power	17
Section 2.6: Chapter Two Self-Test	18
 Part III. <u>Chapter Three - Comparing Two Group Means</u>	
Section 3.1: Looking at Group Differences	20
Section 3.2: Between Versus Within Groups Analysis	21
Section 3.3: Independent T-test Assumptions, Interpretation, and Write Up	22
Section 3.4: Paired T-test Assumptions, Interpretation, and Write Up	25
Section 3.5: Chapter Three Self-Test	27
 Part IV. <u>Chapter Four - Comparing Associations Between Two Variables</u>	
Section 4.1: Examining Relationships	29
Section 4.2: Correlation Assumptions, Interpretation, and Write Up	31
Section 4.3: Chapter Four Self-Test	33
